

Challenge 4 Answer Key

1. Tell a story using a dataset of your choice. (20 points)

10 Points: One table, plot, or model created for chosen dataset.

10 Point: Included element and story are adequately explained.

2. Extra Credit - create additional elements that expand on your story. (<=10 points)

5 Points: At least one additional element was created.

5 Points: Grader's choice - extra points should be awarded for effort/creativity!

If warnings or messages are included in the RMarkdown output or the submission is longer than one page, deduct one point from the final score.
